Forecast confidence for Monday

December 1, 2025
4:24 AM

Location

Low	Medium	High
-----	--------	------

Confidence is **HIGH** that most locations along and north of Highway 50 will be impacted by the higher snowfall amounts, with lesser amounts south of highway 50.

Timing

Low	Medium	High
-----	--------	------

Confidence is **HIGH** that snow will start early this morning and continue into the afternoon

Magnitude

Low	Medium	High
-----	--------	------

Snowfall amounts of 1-4 inches are expected with the higher amounts affecting mainly central Kansas, **highest snowfall rates will occur during the morning hours north of highway 50 in central Kansas**

Small Decisions can have a **BIG IMPACT.**

- Stay off the road during snow
- If you must drive, slow down, don't use cruise control, and increase distance between vehicles
- Have an emergency kit in your car

Don't let a bad decision be your last.
