Wintry Weather Through Late Morning

December 13, 2025
5:40 AM

Additional Snow Accumulation Through Noon

The Forecast:

- Light snow will be possible across north central Nebraska through late morning. Additional snow accumulations of a dusting to 1 inch are possible, mainly over Boyd, northern Holt and Keya Paha Counties.
- In addition to light snow, light freezing drizzle and fog may persist over portions of southwestern into central Nebraska into the early morning hours.
 - This could cause some slick spots on untreated and elevated surfaces - including the I-80 corridor.*

Light freezing fog/drizzle through early morning.
